

Vivreau invented the premium local water category. Our systems help businesses meet their objectives in:

Cost Savings

Environmental Sustainability

Health & Wellness

Brand Building

“ We’re saving in excess of 1 million single use water bottles per year by switching to Vivreau systems, and our guests appreciate the great tasting complimentary water, as well as the fact that it is locally sourced. ”

Chira Pagidi  
Atlantis Casino's Corporate Director of Food and Beverage

## Hospitality

### • Custom Designer Bottles

Showcase your logo and environmental message on these eye-catching, proprietary bottles.

Manufactured with high grade commercial glass, they are extremely durable and reusable for many years.

## VIVREAU AT A GLANCE

We give you the assurance that you are providing the safest, highest quality, and most reliable hydration to your guests. Vivreau uses a **sub-micron activated carbon block filter** in all of our water filtering systems.

This filter allows over **99.9%** of contaminants to be removed, while leaving the healthy minerals intact. Just right for a perfect glass of sparkling water!

### Vi Tap Dispenser

The award winning signature system in our portfolio. Elegant, polished chrome dispenser of chilled still, sparkling and/or hot water at the touch of button.

**Recommended use:** VIP lounge, office pantry, break room or high-end hospitality environment

**Average output capacity:**

80L/hr of chilled still or sparkling water  
11L (48 cups)/hr of hot water

### High Volume Bottler

This high volume water bottling system dispenses advanced micro filtered chilled still and sparkling water and is designed for higher traffic locations and rapid bottle fills.

**Recommended use:** Conference centers, banquet and meeting facilities, restaurants, hotels

**Average output capacity:**

200L/hr of chilled still or sparkling water

### Countertop Bottler

The countertop range of bottlers offers significant output of chilled still and sparkling water, with a small footprint.

**Recommended use:** Corporate catering, office pantry, corporate kitchens and lounge areas

**Average output capacity:**

80L/hr of chilled still or sparkling water

**Sleek cobra-style dispensing taps can be separated from main unit to limit visible equipment.**

### Natural Flavor Collection

Our Natural Flavor Collection provides a health-minded alternative to sugary sodas and expensive fruit infused service. The carefully curated selection of flavors is intended to provide a quick, tasty boost to chilled sparkling or still Vivreau water.

**Free sample kit available to order**

Along with being harmful to the environment, did you know there is **NO REGULATION** of what goes into a traditional bottled water?

All Vivreau products are Intertek and NSF Certified.
